"The Time of His Life."

Kelly's Hall was comfortably filled Saturday night last when the curtain went up on act 1 of the play "The Time of His Life," presented by St. Peter's Lutheran Y.P.S., Edmonton. The play was packed with laughs arising out of a multitude of humorous situations. The leading characters through the 3 act showing were: Howard Miller as Bob Gray; Miss L. Schneider, as Mrs. Bob Gray; Peter Bietach as Tom Carter; Miss Clara Singer as Mrs. Peter Wycombe.

The players were given a very hearty reception by those who attended.

Change in the Beer Plan.

Of its own volition, with an estimated annual profit of \$90,000 in sight, states the Edmonton Journal, the Provincial Government has drawn up the plan which takes distribution of beer out of the hands of the brewery-owned selling agency Distributors Limited according to authoritative reports. The reports say the breweries were consulted several times on the matter but had no part in the decision.

The distribution of beer as a Government enterprise is scheduled to begin on March 1. Under the new system the province will profit to the extent of the spread between the wholesale price, which the Government pays the brewery, and the retail price at which the Government sells to the consumers.

Magazine Prices Reduced.

Magazine readers continue to reap the benefit of the new U.S.A.-Canada tariff treaty which goes into effect Jan. 1 next. The latest magazine to pass on the benefits of price reductions as the result of the treaty is Colliers, a weekly formerly retailing here for 10c and now on sale at the Hayes Drug Store for 5c.

Funeral of Mrs. Pailer.

A well-known and highly respected resident of Stony Plain, in the person of Marie Elizabeth, beloved wife of Mr. Valentine Pailer, passed away in Edmonton Nov. 27, after a short illness. Deceased was 55 years of age.

The funeral took place on Saturday morning, the 30th. A service was held in Saint Philip's church, Stony Plain, which was largely attended by friends of the family. The officiating clergymen were Rev. C. Keenan, the pastor, and Rev. Father Walravens, chaplain at St. Joseph's Hospital, Edmonton. The latter clergyman conducted a service in the German language. Mr. C. Binner, a former resident, led the choir at singing the Requiem Mass, in the service.

Interment was made in St. Joseph's cemetery, at Spruce Grove.

She leaves to mourn her loss her loving husband, Mr. Valentine Pailer; 3 sons, Mr. Valentine Pailer Jr., Onaway; William and Henry, of Stony Plain; 3 daughters, Mrs. Walter Mewick, Ardrossan; Miss Christine, at Vegreville, and Miss Margaret Pailer, at home.

The Trade Agreement

About all that can be said at this juncture in support of the Canadian-United States trade agreement signed at Washington on Friday, Nov. 15, is that it is a step in the right direction and should be a prelude to further concessions in the interests of a freer flow of trade and commerce between two great neighboring and friendly countries.

Both the former Canadian administration and the newly-elected Dominion government are deserving of commendation and congratulation for their respective shares in the negotiations which culminated in a pact to promote greater commercial intercourse between two States, geographically and ethnologically designed for close relationships.

Insofar, however, as judgment can be pronounced on the tangible benefits to be derived by the citizens of the Western Canadian prairie provinces as a result of the agreement, that is a verdict which must await results demonstrable after the pact has been in operation for awhile, and perhaps, for some considerable time.

This is a statement which cannot be emphasized too strongly. For it must be borne in mind that the benefits of a reciprocal commercial agreement cannot be reaped immediately the gates are flung open; nor can the maximum exchange of commodities, for which concessions have been granted, be realized in the earlier stages of the operations of an agreement.

There are good reasons for this. The amount of the duty reductions involved is by no means the only factor which determines the quantity and value of the goods exchanged between the co-operating signatories. There must be an available supply to meet a demand at the time the duty reduction is required. The demand must exist to take care of the supply. Trade practices and seasonal exigencies are contingencies which have to be reckoned with. New financial arrangements have to be made when commodities are diverted into new channels of trade. Existing stocks may have to be liquidated. New methods of packing and shipping may be involved.

Then, too, it should also be pointed out that a number of the commodities on which duties have been reduced under the agreement are subjected to quota restrictions and these will have some bearing in limiting the benefits to be derived.

These are only a few of the factors involved in the diversion of trade over new routes or in developing a trickle into a broad stream. There are others, and because of this, the Western Canadian producer must expect to wait awhile before he is able to reap enhanced prices for the products he expects to sell in a new market and, by the same token, the consumer cannot hope to be able to purchase overnight goods imported under a newly signed agreement at a great deal less than the price he has been accustomed to pay.

Unquestionably one of the most important concessions to Western Canadian agriculture is the reduction of the duty on live cattle exported to the United States. This is one of the items, however, on which a quota restriction is placed. The lowering of the duty will provide a needed outlet for a considerable supply of cattle but, on the other hand, many cattle raisers, who have been almost driven out of the business in the past two or three years on account of drought conditions, will not be in a position to take advantage of the new market for some time.

While Western Canadian consumers will undoubtedly benefit by reduction of tariff on a number of commodities importable from the U.S.A., it should not necessarily be assumed that the benefit will be immediate on all articles covered by the agreement or even, in some cases, to the full extent of the reduction in duty. For example, it has already been announced by the radio dealers' association in Winnipeg that the lowered duty on radios will not result in reduction of price to the Canadian purchaser because radios sold in this country are made in Canada "and are considerably cheaper than the American models plus duty."

These statements are not made with any intent to belittle the agreement, the efforts of the governments who have had a hand in the pact or the ultimate result which may ensue as a result of the insertion of the thin end of the wedge, but they are made in the hope that over-optimism as to immediate results will not result in disappointment.

No matter what the operation of this first agreement may bring in the way of benefits to Western Canadian producers of exports and consumers of imports, the important thing is that it paves the way for further concessions and, it is to be hoped, in the not far distant future.

It might also be pointed out that there are some indications that the operation of this pioneer pact may prove to be more beneficial than the more cautious commentators anticipate. The daily press reported that eastern Canadian manufacturers are apprehensive and, on the other side of the international boundary a number of interests, fearful of the effects of new Canadian imports, are planning to lodge vigorous protests at Washington. Straws show which way the wind is blowing.

This would indicate that the new agreement may be pitchedforked into the political arena in the United States and may be a cause bellum in the next national elections in that country, with what results remains to be seen. It is comforting to know that President Roosevelt has stated he believes the agreement will double the trade between the two countries within a couple of years and it may reasonably be expected that he will defend his action rather than recede from the position he has taken.

The sawfly larva attacks its enemies with a shower of acid.

Survival Of Old Days

The venison banquet, given to the Prince of Wales by the Mayor of Windsor, is a survival of the days when King John, in the hope of discouraging poaching in Windsor Forest, made a gift of venison to the whole town once a year. Successive Sovereigns have carried on the custom in various forms.

On leaving school, German girls are required to take a post as "mother's help" for a year before entering business. No pay except board and lodging is given during this period.

A New Ship Elevator

Will Be Capable Of Handling Vessels Of 11,000 Tons

A ship elevator is being constructed near Rothensee, Germany, about eight and a half miles north of Madeburg, where the Midland canal crosses the River Elbe by a large aqueduct.

The difference between the level of the water of the canal and of the river varies from about 31 feet at high tide to nearly 56 feet at low.

This new elevator will resemble the famous ship elevator at Niederfrow in so far that it will be able to accommodate ships of 11,000 tons, but otherwise represents a different type of construction.

While the Niederfrow elevator rises 210 feet above the earth's surface, the new construction near Rothensee will be built deep in the ground. Instead of the water trough which carries the ships being borne up and down on wire-pulleys, here it will rest on two floats, each 30 to 90 feet, which are propelled by hydraulic pressure, and move up and down in shafts 210 feet deep.

The shafts, which have now been completed, stand over 150 feet apart and are each 33 feet thick with cast-iron interior walls, reinforced with concrete. Pillars 60 feet high carry the water trough, and, like the Niederfrow elevator, the whole structure rests on an enormous concrete caisson.

Canadian Book Contest

\$2,000 To Be Awarded In Prizes For The Two Best Books

Announcement is made of a contest open to any Canadian citizen who is a resident of Canada (as of Sept. 16, 1935) and who feels they have the ability to write a fiction or non-fiction book in the English language of not less than 90,000 or more than 125,000 words. The contest closes June 1st, 1936, and the winning books will be published within six months after the prize is awarded.

Eminent judges have been chosen for the contest as follows: Dr. Pelham Edgar, National Director, Canadian Authors' Association; Mr. S. Morgan-Powell, Assistant Editor-in-Chief, The Montreal Daily Star; Mr. C. R. Sanderson, Deputy Chief Librarian, Toronto Public Library.

Application blanks for the contest and further details may be obtained from George J. McLeod, Limited, 265-268 King St. West, Toronto, Ontario. Secretary, The Canadian Authors' Association, P.O. Box 1424, Montreal, Quebec.

We hope that some of our readers will enter this contest, and wish them all success in their efforts.

Curious Old Laws

Smoking On Street Is Still Illegal In Britain

A recent freak court case at Hastings caused lawyers to search the statute books and remind Britons that curious laws remain un repealed and could send anyone to jail.

Still illegal in Britain are: Smoking a cigarette in the street. Sunday radio broadcasting. Christmas dinner of more than three courses.

Making a mince pie "an abominable and idolatrous thing." Playing billiards on a Sunday.

It is possible, according to the old laws, for anyone to be jailed for inducing another person to drink more liquor than would be good for him.

In Primitive State

Says Indians Of James Bay Area Have Changed Little In Past Centuries

Despite three centuries of missionary and other contacts with the white race, one group of Canadian Indians to-day was reported much the same as it was 1,000 years ago.

Dr. Truman Michelson, Smithsonian Institute ethnologist, found last summer that the James Bay Indians in the northern part of Ontario have changed their language, customs, folklore and mythology little during the past eight or 10 centuries.

He said they probably are nearer than any other Indians to the type of primitive Algonquians who peopled eastern North America long before the white man arrived.

Famed River Drying Up

Many Ships Stranded On Sand Banks In Blue Danube

The famous Danube river is drying up—as a result of drought unprecedented for this time of year.

The Danube and Sava, which meet under the walls of Belgrade, are now lower than for more than 50 years. In many places people can wade across them.

All navigation on the Sava has been abandoned and many ships are stranded on sand banks. On the Danube only small vessels of less than four feet draught can pass.

River service between Belgrade and Vienna has stopped.

As one gets nearer the earth's magnetic poles, the pull on the compass needle becomes weaker.

A flannel cloth dipped in oatmeal makes a good cleaner for painted woodwork.

Rubber latex is successfully used for cement purposes.

Life Insurance

Companies Have A Mission To Perform That Is Vital To The Future

The Canadian Life Insurance Officers' Association is "the biggest of the big interests," but that is a reason for pride and not apology. Finance Minister Charles Dunning told members attending the 42nd annual meeting of the association at Toronto. Mr. Dunning spoke briefly.

Representing assets of \$2,500,000,000, and acting on behalf of 3,500,000 policy-holders life insurance men have a duty of trusteeship to perform that is vital to the future of Canada, Mr. Dunning asserted.

"There is scarcely a big interest in this country," he remarked, "that is not in reality an intricate system of trusteeship. Without you, and the trusteeship of \$2,500,000,000 which you represent, Canada would be in a vastly different place than it is today."

Big interests must not be regarded as sinister just because they were big, said Mr. Dunning, in urging insurance officials to stress their trusteeship to the people.

Would Construct Highway In Northern Alberta To Develop McMurray Sands

Negotiations have started toward construction of a highway between McMurray and Fort Fitzgerald in northern Alberta which would aid in development of the McMurray sands. Hon. W. A. Fallow, Alberta minister of public works, announced at Calgary.

Mr. Fallow, speaking at the annual meeting of the Calgary branch of the Alberta Motor Association, said a syndicate interested in development of the tar sands would build the road in return for an exclusive franchise for freight and syndicate transportation for hire.

McMurray is about 230 miles northeast of Edmonton and connected to that city by a railway. Fort Fitzgerald is about 210 miles north of McMurray. In northeastern Alberta a highway extends only to Athabasca, about 185 miles southeast of McMurray.

The highway which would also aid in opening up of salt fields in the area, Mr. Fallow continued, would be open to the public for pleasure and business traffic other than transportation for hire. He valued the tar sands at \$90,000,000 and said a product of the salt fields could be used for hard surfacing all Alberta highways in the future.

"In the very near future it is the intention of the government to have surface arterial highways in this province," Mr. Fallow declared. He mentioned particularly the trans-Canada from east to west across Alberta and the highway from the international border to the north of the province.

Mr. Fallow told the Calgary branch he was not in favor of helping to "keep the railways in the red" by criss-crossing main highways over the province alongside railway lines, but he felt it should be definitely determined what constituted Alberta's arterial highways and these should be constructed and maintained.

"I feel we should pay a little more attention to the feeders to the main arterial highways so that the country people can at least reach a gravelled highway and go to the city on a wet day," he said.

Potato Is Living Organism

Sudden Rise And Fall In Storage Temperature Is Harmful

In the storage of potatoes it has always to be remembered that the potato is a living organism and that there are two periods when respiration may become of practical importance. One of these is immediately after digging, and the other a period of several days following a sudden rise in storage temperature. To prevent sweating special attention should be given to the ventilation of potatoes handled in bulk immediately after digging, and also after sudden rises in temperature following a period of steady cool storage. The lower the storage temperature, the higher will be the initial rate of respiration; a sudden higher temperature, sudden rises and falls in storage temperatures are to be avoided always. The early fall in the time to provide all possible air circulation by keeping ventilators and doors open until there is danger of freezing. On warm days doors should be closed and opened only at night when the air is cooler. The amount of ventilation required is that which will keep the potatoes dry. From early December onwards all ventilators and doors should be closed and protected and prevent the potatoes from being frozen.

Trade With Russia

May Be Part Of Government's Policy Of Trade Expansion

Resumption of trade with Russia as part of the government's policy of world-wide trade expansion was reported in official circles as probable. "I think we should trade with every country," Hon. W. D. Euler, minister of trade and commerce, said. The former Russian government, in February, 1931, placed an embargo against Russian wood-pulp, lumber, timber of all kinds, asbestos and dressed furs.

Control Of Moths

Damage By Moths Can Be Heavy In Winter

Under the impression that moths commit their depredations in the spring and summer months only, many people display little care in putting away their summer clothes for the winter. As a matter of fact, moths may be found in heated modern buildings all the year round. Prevention is better than cure; therefore it is necessary to use the same care in packing up summer clothing in the fall as is bestowed on winter clothes in the spring. Moths themselves do no harm, except that they lay eggs, and when the eggs hatch into larvae, or caterpillars, feeding, otherwise damage, commences at once. As the young larvae are very sensitive to light, they seek out protected situations in the folds of furs or woollen garments, or in the interior of upholstered furniture. Summer garments before being laid by for the winter should be thoroughly brushed, beaten, and shaken, preferably in strong sunlight. If there are no airtight trunks or chests handy, the clothing should be placed in cotton or paper bags or in cardboard boxes sealed with strips of paper. As an alternative, the clothing should be wrapped in two thicknesses of strong wrapping paper, taking care that the edges are turned on so that the moths cannot gain entrance. The control of moths which infest clothes is fully discussed in a circular prepared by the Entomological Branch of the Dominion Department of Agriculture.

Growing Japanese Nuts

Production Is New Venture Of Queenston, Ontario, Farmer

That the climate in Niagara Peninsula is well suited to the growing of Japanese nuts has been demonstrated at the Larkin farm, Queenston. On this farm may be found 25 Japanese nut trees, now in their second year of bearing. James A. Calvert, manager of the farm, stated a few days ago that he imported the young trees from Japan about ten years ago, and planted them as a border between the garden and orchard. They are not being grown commercially. The trees are now about 12 to 14 feet high and have a spread of some 16 to 17 feet. The nuts, of the Pecan type, grow in bunches. There are many grey squirrels in the Queenston district, and they get most of the crop.

Would Like Company

"Now, in case anything should go wrong with this experiment," said the professor of chemistry, "we and the laboratory with us will be blown sky high. Now, come a little closer, boys, in order that you may follow me."

Long-Range Weather Forecasts

Noted Astronomer Says Tree Ring Method Can Be Used

The world's most discussed subject—the weather—is about to furnish man with a scientific discovery which would revolutionize agriculture and business.

So believes Dr. A. E. Douglas, famous originator of the tree ring method of dating prehistoric ruins, who announced at Tucson, Arizona, that those same tree rings were revealing climatic repetitions which eventually would make possible long range weather forecasts, thus saving farmers and merchants untold billions of dollars.

The noted astronomer, who directs Steward Observatory at the University of Arizona, pointed out as an example of the tendency of climate to repeat itself over many centuries, that he and his assistants have completed in the Prescott, Arizona, area.

"Our research in the Prescott region tends to prove that the weather is not quite as fickle as man has always thought and that it does repeat itself to a certain extent," he said. "Rainfall records at Prescott go back almost continuously to 1867. The tree records in the pine forests about Prescott give 500 years of weather records and archaeological specimens of timbers from the nearby ruins extend the record back for another 1,500 years."

"These tree records of 2,000 years closely resemble the records of rainfall since 1867. This resemblance is very close, almost 85 per cent. We need distinct changes which have continued on a cycle of about 20 years in length."

"The trouble with weather study in the past has been that we have been applying old astronomical methods, wanting to catalogue climate just as we would the seasons of the year or the movements of the heavenly bodies."

"Rainfall from year to year is erratic. In our new method of studying climatic changes, we are taking them as they are and seeking to find a new method of expressing those changes."

"In carrying out this method we are finding repetitions of which use can be made. We believe that we will soon be able to issue statements which will be of great value to people dependent on agriculture."

Dr. Douglas began his tree ring work 35 years ago and has the only claim of its kind in the world at the University of Arizona.

Theory About Tuberculosis

N.S.W. Health Department Thinks Disease Contracted In Childhood

After some years research, the health department of New South Wales has reached the conclusion that tuberculosis is contracted in childhood with a dormant period for the disease. Sometimes it develops rapidly, but in many cases, the disease remains dormant until a dangerous period is reached, usually between the ages of 15 and 25.

The conclusion is expected to throw much light on the treatment and prevention of tuberculosis. At the university in Sydney special attention is being given in cancer research to the possibility of finding a chemical substance which, if injected into a tumor, would make it more amenable to the action of X-rays.

"Many investigators believe," said Dr. Moppett (medical biologist of the research committee), "that when radiation cures cancer, it is due to co-operation with the body defences."

Fraser Man As Driver

Women like a man at the wheel—so Miss Lena Hilberling is out of a job as taxi driver. She was released after a week's tryout in Topeka, Kansas, to see if an attractive driver would attract more business.

The tail of a comet is so thin that the earth could pass through it and no one but the astronomers would realize it.

Canada's Reindeer Herd Established In Northern Reserve To Assist Natives

Tree Adopts Branches

Unique Grafting Experiments Have Resulted In Amazing Success

The one-tree "orchard" of F. A. Good, Fredericton, has borne 35 varieties of apples and 90 other varieties of blossoms this year, compared with 50 varieties of apples and about the same number of other blossoms during the previous season. Unique grafting experiments have resulted in the single tree producing almost every variety of apple native to New Brunswick.

Nine years ago the present "orchard" was an ordinary tree bearing its one variety every season on Good's farm seven miles from Fredericton on the trans-Canada highway. The farm has many other fruit trees but the famous apple tree stands in an isolated spot where its fast-growing adopted branches have plenty of space to expand.

"It isn't anything wonderful," Good told a visitor as he picked a Bishop Pippin and a McIntosh from what appeared to be the same branch. "When I first started grafting other varieties to this tree I only intended to graft about 20 or 30, but then as these flourished I conceived the idea of trying to grow on one tree all the varieties of apples found in New Brunswick. Now I think I have them all here except two or three."

Menace Feed Of Livestock

Antelopes Are Numerous On Ranches of Alberta, Manitoba

Pronged Horned antelopes—protected against hunters since 1914—darted across ranch lands of the Alberta foothills in such numbers they threatened the food supply of cattle and sheep.

Two years ago the antelopes encroached on the ranchlands and ranchers were forced to drive them off. This year they are coming out of their usual haunts in still greater numbers.

An open season was declared on antelope but few hunters have taken advantage of it by paying the \$5 license fee.

Flesh of the animals makes good eating which accounted for the protective measures taken. Indians were killing them wholesale before game officials stepped in.

The curved horn of Rocky Mountain sheep grow until they sometimes interfere with seeing, whereupon an old sheep will break off the annoying horn against a rock.

Reports received by Honourable T. A. Crerar, Minister of Interior, indicate the gratifying progress which has been made in the work of establishing Canada's reindeer herd of over three thousand animals on the 6,000 square mile preserve set aside for it east of the delta of the Mackenzie river. The condition of the herd and the prospects for its future development as a source of supply of food and clothing for the natives of Canada's Far North is considered highly satisfactory. The first fawing at the Government station took place early in the spring shortly after the animals had been delivered to representatives of the Department of the Interior, and as a result 811 fawns were added to the herd. The total at the station as shown by the August round-up is well over 3,000 animals. The movement of the animals to the winter range was begun about the middle of September and it was expected to be completed early in November.

The delivery of the herd by the vendors took place in March and the animals, after being inspected, marked, and counted were turned over to the herders on the summer range which extends along the Arctic coast east of the mouth of the Mackenzie river. Here the fawning took place and both the young and mature animals progressed rapidly on the splendid forage available on the preserve. With the approach of winter the reindeer were herded inland by easy stages to the present location on the winter range.

When the herd of 2,870 animals was delivered to the Government station, the count showed that there were 1,498 females of all ages; 611 bulls, yearlings, and male fawns, and 261 steers. This showed a female percentage of over 60 per cent, which was considered highly satisfactory after the long drive of over four years from western Alaska. With the herd established on its new grazing range, departmental officers in charge considered that for the better development of the herd the number of animals should be reduced. As a result the surplus animals now number about 690 steers of all ages. A certain number of the mature animals, that is those three years of age and over, will be slaughtered from time to time to meet the requirements of the North. In accordance with this policy a number are being slaughtered this autumn to provide meat and skins for the care of native children in the Anglican residential school at Shingle Point and the Roman Catholic residential school at Aklayik and for the native inmates of the two mission hospitals at the latter point.

In the opinion of officers of the Department of the Interior the range comprised within the reserve is the best along the western rim of the "continent" Moose and lichens give the great expanse of the reserve and the northern part or summer range provides forage in abundance for the herd from June until September. The winter range, which extends southward along the easternmost branch of the Mackenzie river and borders the northern fringe of the timberline is also well covered with the favoured plant food of the reindeer. Both ranges are well watered and comparatively free from predatory animals.

The work of training apprentices with the object of eventually establishing small herds among the natives has already begun and two youths, one an Eskimo and the other a white boy, have been engaged. These boys will serve under the six herders—three Lapps and three Eskimos—now on the staff of the station. The practice of training natives as herders and the distributing of numbers of reindeer to these apprentices as payment for their services has proved successful in the development of the reindeer industry in Alaska and whether this system will be given a trial at the Canadian station is now under consideration by the Minister of the Interior.

All spiders are short-sighted.

Do This Hanging in Wool or Silk

PATTERN 567

What a choice Christmas gift this wall hanging would make! It adds a decorative note to a home and is a constant reminder of the thoughtful giver. And what a pleasant diversion for the needlewoman who makes it! It is a companion pattern to the lovely parrot hanging 5558 shown recently and used with it, is sufficient decoration for any room.

In pattern 567 you will find a transfer pattern of a picture 18 x 20 inches; a color key and key; material requirements; illustrations of all stitches used.

To obtain this pattern send 20 cents in stamps or coins (not preferred) to Household Arts Dept., Winnipeg Newspaper Union, 115 McDermott Ave., Winnipeg.

There is no Alice Brooks pattern book published.

WORLD HAPPENINGS BRIEFLY TOLD

Emperor Haile Selassie ordered a chieftain of the Jijiga region flogged for cowardice in battle. The troops under his command and his property was turned over to another Ethiopian commander.

A 50 per cent. reduction in the rate for long distance telephone calls is announced by the Manitoba telephone system. Effective Dec. 1, the reduced rates apply throughout the province.

Rear-Admiral Carey T. Grayson, head of the United States Red Cross, said Japan has sent enough surplus materials to the International Red Cross to care for 10,000 Ethiopians wounded.

Drastic overhaul of Britain's shipping regulations is in sight. The evidence gathered by the board of trade inquiries coupled with the growing toll of British ships lost at sea is creating wide uneasiness.

The successful flash of the world's largest piece of glass, the 200-inch mirror or "eye" of the world's largest telescope, was revealed at the Corning glass works. This huge telescope mirror was poured Dec. 2, 1934 and has been cooling ever since.

Elimination of the Alberta debt adjustment legislation and the whole subject brought within the jurisdiction of Dominion legislation was urged in a resolution sent to federal authorities by the Calgary Board of Trade.

The Irish Transatlantic Corporation decided to press for the appointment of a select committee of the House of Commons to inquire into an alleged attempt to create a monopoly of the north Atlantic air route for the benefit of certain interests to the exclusion of other companies.

Carrying Out Contract

Bodies Of Chinese Being Sent To Native Land

A contract with the dead, assuring their peaceful rest by the side of their honorable ancestors in far away China, was on its way to fulfillment.

In Mount Auburn cemetery of Stickney at Chicago, diggers were exhuming the bodies of 400 Orientals under direction of the Chinese Consolidated Benevolent Association. During their lifetime it had pledged on conditions of payment of a stipulated fee that it would insure their final interment in the land of their fathers and in the sepulchres of their families.

The pouch of the full-grown peacock is capable of holding seven quarts of water.

The RAMSAY P. O. Box 278 BANK ST. OTTAWA, ONT.

Above are two personalities in the new Austrian cabinet which was changed after the recent Fascist coup by Prince von Starhemberg. Left is Dr. Ludwig Drazler, Minister of Finance, and, right, Major Eduard Baer von Baarenfels, new Minister for the Interior and Security.

New Census Of Stars

Discloses Number, Size Of Sun, Not Previously Identified

An astronomical star census, by a new method reported to the National Academy of Sciences at Charlottesville, Va., increases the theoretical mathematical chances of life like that on earth existing elsewhere in the universe.

This report does not discuss the possibilities of life, but shows a larger number of stars the size of our sun than previously identified. Its new star census sits directly into the statistics by which astronomers have been calculating the chances that there might be other suns with planet families and evolutions just like ours.

Such an "accident" was once considered remote. Lately the almost incredible multiplication in the estimated numbers of stars has caused astronomers to consider the "accident" of exact similarity more possible, and the census shows the existence of an increased number of specific places where there might be duplication.

The star count was made on "dwarf" and "giant" stars by F. Van de Kamp and A. N. Vysotsky of the Lick-McCormick observatory, University of Virginia.

Jewels Determine Rank

Precious stones of different colors are worn by the various ranks of Chinese mandarins. The highest rank wears a red ruby or pink tourmaline; the next rank wears coral or garnet; the third rank beryl or lapis lazuli; and the bottom rank white rock, crystal, or other stones.

Americans are said to purchase \$30,000,000 worth of fraudulent stocks each week.

Delicious Crisp Cookies

This Recipe Proves They Are Easy To Make

Temperature: 400 degrees F. Time: 15 minutes.

2 squares unsweetened chocolate
1/2 cup shortening
1/2 cup sugar
1/4 cup "Crown Brand" Corn Syrup
2 eggs, unbeaten
1/4 cup flour
1/4 cup Benson's Corn Starch
1/4 teaspoon vanilla
1/2 cup finely chopped nuts

Method: Melt the chocolate in the top of a double boiler. Remove from heat and add the shortening, sugar, "Crown Brand" Corn Syrup, eggs, flour, Benson's Corn Starch and vanilla, beating the whole mixture thoroughly, being sure the eggs are added one at a time. Spread the mixture on baking sheets which have been oiled with Manola. Sprinkle with nuts and bake in a hot oven. Cut while warm. These cookies are very crisp and easily made.

Largest Fleet Afloat

Amasses Quite A Considerable Fortune With Sailing Ships

Captain Gustaf Erikson of Mariehamn, Finland, former sea captain and now owner of the largest "wind-jammer" fleet afloat, is sending five of his largest vessels to Australia.

On arrival at their destination they will be loaded with grain and other merchandise for Britain.

Captain Erikson, who is credited with having amassed a considerable fortune with his sailing ships has a fleet of 26 vessels with a gross tonnage of 65,670.

Swedish snouts are used to spear head mountains by various savage tribes.

Knit and Purl Your Way to Style

Household Made by Alice Brooks

Keep Your Needles Busy With Easy Stitches

PATTERN 5484

The dressy type of sweater-blouse is becoming of more and more fashion importance for every sort of daytime occasion. Why not get to work and knit one for yourself—you may be able to finish it in time to wear, Christmas day! This new costume features an unusual decoration of fanlike knitted pleats. The interesting self-pattern in the body of the sweater is just knitting and purling—though you'd never guess it! Add a simple knitted skirt and you will have an easily-made outfit which will win many compliments for you.

In pattern 5484 you will find directions for making the blouse and a plain skirt in sizes 16-18 and 38-40; an illustration of the blouse and of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winthrop Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

"IT'S A DOUBLE AUTOMATIC BOOKLET" only 5¢

Chantecler CIGARETTE PAPERS

SUNDAY SCHOOL LESSON

DECEMBER 8

NEHEMIAH REBUILDING THE WALL OF JERUSALEM

Golden text: The people had a mind to work. Nehemiah 4:6.

Lesson: Nehemiah 2:1 to 7:4.

Devotional reading: Psalm 4:6.

Explanations And Comments

The Bitude of Sanballat and Tobiah, 4:1-8. "What are these feeble Jews up to?" mockingly questioned Sanballat before his brethren and the army of Samaria. "Do they think they can do it all in a day? Do they expect to bring the stones to life out of these heaps of rubbish?" And Tobiah joined in the ridicule: "That stone wall which they are building," he said, "will be broken down if a fox tries to scale it." Their words were repeated to Nehemiah, and he appealed to God to judge them.

As he progressed so rapidly, for the people "had a mind to work," that the rebuilt wall soon attained half their height.

The secret of much of the failure in the lives of men, the ground for much of the finest success, may easily be discovered in these words, "The people had a mind to work." Great and worthwhile tasks are never very easily done. The City of God does not spring up over night like a mushroom. Its building requires hard and patient and faithful toiling, and the man who is not willing to give that will not help greatly in the undertaking.

At the moment there is a great shortage of the work by which men earn their daily bread, but there is still plenty to do in that great enterprise of setting up God's Kingdom among men. It is calling loudly for men and women who have a mind to work.

Many Enemies Conspire Together to Stop the Work, 4:7, 9, 11. Common hatred has a wonderful power of uniting former foes, and the various peoples of the land, Arabians, Ammonites, Ardhodites, as well as Sanballat and Tobiah, were no exception. When they learned that the work of rebuilding the wall was progressing rapidly and that the bricks were being filled in, they were greatly angered. They feared to have Jerusalem again a powerful political centre, but more than this they were their hatred of the religious ideals that inspired its rebuilding.

They planned to go to Jerusalem together, expecting that their coming would terrify the timid, confusion would result, and work would cease. They planned to come so stealthily as to take the Jews unawares. But Nehemiah posted sentinels day and night, and prayed, and to pray and watch is the road to victory.

Building and Battling, 4:13-23. Forewarned, forearmed. Therefore, in the lowest spaces behind the walls and in the open spaces, Nehemiah placed people with arms, arrows for use when the enemy was at a distance, spears as the enemy drew near, and swords for a hand-to-hand fight. And when he beheld the enemy approaching in the distance, he counselled fearless fight; but the enemy, hearing that their plan for a sudden attack was known to the Jews, retreated, and the latter resumed their work upon the walls.

From that time onward, half of Nehemiah's bodyguard worked on the walls, and half stood ready with spears, shields, bows and coats of mail. Back of the builders were the rulers, ready to issue orders when the trumpet sounded an alarm.

The Wall Finished, 6:15-7:4. Despite all opposition from enemies and all fears and weakness of workers, the wall was completed in a short space of 52 days. With great rejoicing a solemn dedication was held, which will be our text next week.

A Special Command

"Halt!" yelled the sergeant to a new squad of recruits. But one of them murmured.

"Here, Jones, what were you doing before you joined the army?" yelled the sergeant.

"A horse driver, sir," replied Jones.

"Stop!" the squad was marching again the sergeant cried: "Squad halt! Jones, whoa!"

Tomb Among Buddhists

U.S. Scientist Will Be Buried In Chinese Monastery

Alan Priest, curator of the Oriental department of the Metropolitan museum has a newly completed tomb waiting for him in the Buddhist monastery of Chief Tai Ssu, or the Monastery of the Ordained Terrace.

The religious structure, 25 miles from Peking, dates back to the third century A.D.

In the communal graveyard, dating back to the Ming dynasty, Mr. Priest has his tomb. It is the typical Buddhist form of shaped, gray bricks, rising ten feet and looking not unlike a creme de menthe bottle. It is overshadowed by a great pagoda and other shrines 400 years old. Giant evergreen trees equally ancient give shade.

Mr. Priest's plaque on the tomb merely carries the date of erection in Chinese characters, but it might some day include the character "Pu," Mr. Priest's name in Chinese.

In order to receive this special favor of resting in death among the monks, and in one of America's leading sinologists, He put the finishing touches to a book manuscript on Chinese subjects while on leave in Peking.

Grim Curio For Sale

Cabinet Owned by Notorious Poisoner Has Sinister History

A large, highly-ornamented cabinet, with a sinister history, was on view in London at Selfridge's recently.

It was given to Lucrezia Borgia, the notorious "mass" poisoner of the Renaissance period, by her brother, Caesar. It contains dozens of secret drawers in which Lucrezia is reputed to have kept liquors and wines. The most interesting feature, however, is the key, in the handle of which is hidden a needle which remained embedded in a deadly poison.

Lucrezia's enemies often attempted to open the cabinet, but their ignorance of the existence of the needle meant a swift death in terrible agony.

The cabinet was later given by Cardinal de Medici to Cesar Alexander I., and remained in the possession of the House of Romanoff until 1917. It was often admired by Rasputin.

It is now owned by Baron von Landauer, and is for sale at \$3,000.

"Tom proposed to me in his auto." "Indeed?" "And I refused him in the hospital."

WORRIED ABOUT YOUR HEALTH?

TAKE SASKASAL

Nature gives to Canada in magnificent abundance the natural Mineral Salts found in Little Manistowick. These medicinal Salts are refined and prepared by expert Chemists in the form of SASKASAL SALTS.

Thus SASKASAL, in turn gives to Canadians in simple form—easy and pleasant to take—the cleansing, purifying, medicinal products of Nature. That is the simple story of SASKASAL. Sales are being made in your own lost health and maintaining it in joyous vigor. If you suffer from Constipation, Indigestion, Rheumatism, mild Jaundice or Liver troubles—take SASKASAL. Salts. At all Drug Stores—49c.

GOVERNMENT TO INVESTIGATE THE PRISON SYSTEM

Ottawa.—It was the intention of the government to appoint a royal commission to investigate Canada's penitentiary system, Hon. Ernest Lapointe, minister of justice, stated, but plans for setting up the commission have not reached a stage where any announcement could be made.

Report of the Ontario attorney-general on the case of David Meiser, serving a 15-year sentence for the Labatt kidnapping, was being studied by departmental legal experts, Mr. Lapointe said, and he would not expect to be in a position to announce his decision for several days.

Speculation as to the fate of the Canadian wheat board and the policy to be adopted by the government to ward disposal of the wheat surplus still lacks any official background and Mr. Lapointe said there was nothing to announce in this respect.

It has been strongly rumored that John I. McFarland, chairman of the board, would be replaced by James R. Murray, vice-president and general manager of the Alberta Pacific wheat pool.

With the death of Hon. Charles Murphy of Ottawa the prime minister has a vacancy to fill in the senate and several names have been prominently mentioned. These include Frank O'Connor and W. T. Kernahan of Toronto, John Gleason, Ottawa, R. M. Burns, London, and J. J. McCann, member-elect for South Renfrew. A seat must be found for Hon. C. A. Dunning, minister of finance, and it has been repeatedly rumored that Ontario would furnish it. Appointment of Mr. McCann to the senate would open up South Renfrew.

Would Abolish Senate

De Valera Makes New Move For Irish Free State
Dublin, Irish Free State.—Eamon de Valera, president of the Irish Free State, made a new move for abolition of the senate.

He tabled a motion in the all-Ireland assembly that the bill known as "constitution amendment No. 24" be sent to the senate. The bill would consider it Dec. 5.

The bill in question proposes to abolish the senate. It has been held up for 18 months following its rejection by the senate. Under the constitution, after 18 months the constitution is empowered to send a defeated bill to the senate again.

If the upper house again rejects it, it can, nevertheless, become law within 60 days.

High Standard

Dr. Banting Says Medical Work In Russia Reached High

Hamilton, Ont.—Sir Frederick Banting, one of the discoverers of insulin as a cure for diabetes, told the Hamilton Health Association of the high standard of medical work he observed on a recent visit to Soviet Russia.

"You rarely see a case of tuberculosis that requires bed treatment in Russia," he said. "Trade union doctors examine the workers before they enter factories and they are placed under care immediately if any signs of disease are detected."

Terror Man Sentenced

Winchester, England.—Arthur Charles Mortimer, called a "terror man" for his alleged practice of running down girl cyclists while driving a stolen automobile, was found guilty of murder and sentenced to death. The six-foot-tall lance corporal, stationed at Aldershot barracks, was found guilty of fatally wounding Mrs. Phyllis Mary Oakes, a beautiful private secretary, by deliberately running her down Aug. 8.

Report Was Denied

London.—British official sources denied reports that Sir Winston Churchill, prime minister, had written a personal letter of appeal to Premier Benito Mussolini calling for cessation of the Italo-Ethiopian war.

Peace Efforts

France And Britain Endeavor To End Conflict In Ethiopia

Geneva.—The British and French international circles that France and Great Britain are making determined efforts to end the conflict between Ethiopia and Italy by conciliation and law evidence of this in the broadcast by Premier Laval, of course, of his appeal for national support.

In Italian quarters it was agreed the best chance for halting the war is through a direct agreement between Mussolini and Emperor Haile Selassie, which is admittedly difficult.

The Paris newspaper L'Ouvrier, said it had learned in reliable quarters Great Britain has offered to serve as intermediary in peace talks between Italy and Ethiopia.

The League of Nations' general staff of experts met to examine the general sanctions situation with the projected addition of an oil embargo to the war penalties.

Find Lost Mine

Rich Copeland Mine In Northern Ontario Believed Located

Hudson, Ont.—The word went around in this western Ontario mining district that the lost Copeland mine, a mine that produced riches in the early years of the century, had been found.

The mine was abandoned when efforts were made to locate it recently it could not be found.

An accident some days ago revealed the Copeland. Two miles of the nearby Sakoske gold mines tripped over a rusty shovel while walking through dense bush. The finding of the shovel led to an extended search of the area. A quartz vein containing free gold was uncovered. A plentiful sprinkling of rose quartz in the vein indicated that the find, almost beyond doubt, was the Copeland.

Training German Children

All Over Ten Must Prepare For Labor Service

Berlin.—German boys and girls over the age of 10 will undergo special training to prepare them for the compulsory labor service in the third reich, the Nazi government announced.

The boys will have additional preparation for the obligatory military service which they must perform after their terms in labor camps.

Both young men and young women must serve in compulsory labor camps under the law intended to make the German nation physically and mentally fit to meet any domestic or foreign crisis.

Profits On Canal

Suez Doing Tidy Business From War Operations

Paris.—An increase of 35,000,000 francs (about \$2,775,000) in Suez canal receipts in 1935 over 1934 was forecast by canal officials.

Italian military operations, it was announced, were entirely responsible for an increase in traffic which made the income, from Jan. 1 to Nov. 20, 780,000,000 francs compared with 740,000,000 francs for the corresponding period of last year.

New Radio Station

Edmonton.—Forging the last link in an aviation chain of private short wave radio stations linking northern Alberta, Saskatchewan and Manitoba and extending into the northwest mining area as far as Cameron Bay, N.W.T., a radio station is being opened in the offices of Canadian Airways Limited, here, C. H. "Punch" Dickins, company superintendent, announced.

Motor Fatalities

Chicago.—Deaths on the highways of the United States reached a new high mark in the first 10 months of 1935, the National Safety Council disclosed. Council statisticians counted 28,760 motor vehicle fatalities in the first 10 months of this year compared to the previous high of 28,753 during a similar period in 1934.

A non-abrasive liquid that does not require rubbing has been invented for removing rust formation from chromium plated surfaces.

TO BE ROYAL HOSTESS

When George II. resumes his duties as King of Greece after an extended exile, which ended with a recent plebiscite in his favour, his sister, Princess Helen, will reign as "royal hostess" instead of his estranged wife who is not in popular favour with her former subjects. Princess Helen divorced King Carol of Rumania a few years ago.

Oil Embargo

Italy Takes Very Seriously The Threat Of League

Rome.—Premier Mussolini has recalled to the colors 100,000 soldiers previously released for farm work, and personally presented a \$33,000,000 naval construction decree to the chamber of deputies.

Italy was said to look very seriously upon the threat of a League of Nations oil embargo. Sources near the government said the country might even resist forcibly an extension of league sanctions. They asserted Italy would be slowly strangled if embargoes on coal and oil were added to the severe sanctions already being applied. Gasoline prices rose to \$1.08 a gallon.

Well informed circles said Italian oil stocks probably were not large, as statistics showed imports this year had been only a little above normal. Continuing his drive to overcome the threatened shortage in fuel, the premier will personally inaugurate the work of the Chemical Corporation.

This group will be entrusted with the duty of developing productions of alcohol, wood alcohol and benzol, the only native materials capable of replacing imported petroleum products.

Italy's semi-official oil monopoly was increased in size to facilitate a full control of the market.

Filming The Quintuplets

Toronto.—Canadian cameramen, studio workers and electricians will be employed in the production of the Canadian scenes of the "Country Doctor," in which the Dionne quintuplets will star. Minister of Welfare Craig has announced.

At the left is Earl Winterton, former under-secretary of state for India, who is slated to take the place of William Ormby George, right, first Commissioner of Works who has become the new Minister of War in the British Cabinet.

Atlantic Air Mail Service

Discussions At Ottawa Expected To Speed Up Activity

Ottawa, Ont.—Airmail discussions between representatives of Great Britain, the Irish Free State, Newfoundland and Canada concluded and it is confidently expected that, as a result of the conference, airmail activity in Canada will be greatly accelerated next year.

The main topic of discussion has been the launching of a trans-Atlantic airmail service. Such a service will require heavy mail subsidies and a knotty problem to be solved is to apportion the total subsidy among Great Britain, the three Dominions as well as the United States. So far as the technical end of the service goes, practically all of the work, so far as the empire is concerned, will have to be done by Imperial Airways and the interviews given out by the British delegates clearly state that rapid progress is being made. What Canada must decide is the extent and nature of the land facilities which will be required and the contribution which will be made to the support of the trans-Atlantic service.

Working On Proposal

Unemployment Commission Is Receiving Attention Of Premier King

Ottawa.—Completion of the basic details of a national unemployment commission, a plank in the Liberal government's program, is understood to be one of the activities which engaged the attention of Prime Minister Mackenzie King during his visit to a Georgia seaside resort.

Some weeks ago the premier said it would be the intention of the government to have the unemployment commission practically completed before the Dominion-provincial conference which opens Dec. 9. The commission will be patterned somewhat after the Canadian patriotic fund commission. It will be an honorary commission with a salaried executive.

Increase In Employment

Level Higher Than In Any Month Since December 1930

Ottawa.—An employment gain in Canada of 14,803 persons between Oct. 1 and Nov. 1 was reported by the Dominion bureau of statistics. The bureau said the Nov. 1 payroll of 9,482 firms making returns stood at 1,012,103 persons compared with 997,300 on Oct. 1.

The bureau reported the employment level at Nov. 1 was higher than that of any month since Dec. 1, 1930. It said particularly important improvements occurred in logging while highway and building construction, mining, retail trade and manufacturing also contributed gains.

Presentation To Ferguson

London.—In recognition of his services to business interests a luncheon was tendered to Hon. C. Howard Ferguson, formerly Canadian high commissioner to London. Under the chairmanship of Sir Hewitt Skinner, 300 of the Anglo-Canadian trading community attended and presented Mr. Ferguson with a George II. silver loving cup. Mrs. Ferguson was presented with jewelry.

OIL TANKERS ARE ORDERED TO BE IN READINESS

Montreal.—Masters of oil tankers forming the large fleet owned by the British admiralty and operated under charter by commercial interests, have received orders to hold themselves and their ships in readiness. The Gazette adds.

"Several of these admiralty tankers are well known in Montreal," the paper continues. "One of them, the Olma, was in port only last week. While the waterfront is familiar with their true identity—that of ships owned by the royal navy—they come here as commercial vessels operated by an oil company and handled through regular steamship agents."

"Recently, when conditions in the Mediterranean became serious, orders went out to the masters of these tankers—some of the Royal Naval Reserve—to hold their ships in readiness for any call that might be made upon them at any time, according to information gained here."

"Not required by the navy in the ordinary course of events, the tankers are let on charter and ply between a number of ports, including those of the Dutch East Indies. They come to Montreal at various times throughout the navigation season, bringing oil and gasoline to local wharves."

"They are subject to recall at any time by the British admiralty, and in a case where they would be required on active service, would be used to refuel ships of the royal navy at sea."

"The British admiralty owns a large fleet of these oil tankers, numbering about 50 in all. Most of them were built in 1917 and 1918, and were used during the war. A few are of later date, constructed in 1920, 1921 and 1923."

"The tankers are in command of officers holding rank in the Royal Naval Reserve."

Royal Air Force

Capt. Pocock Recommends Flying To Those Who Like Adventure

Toronto.—Capt. Roger Pocock, one of the world's great adventurers, recommended the Royal Air Force to young fellows with a yen for adventure and danger. The 70-year-old captain said: "Always tackle the most dangerous thing you can find." Founder of the Legion of Frontiersmen, a non-military organization devoted to the defence and "safety, honor and welfare of our sovereign and his dominions," Capt. Pocock came here in the course of an empire tour to further the interests of the organization.

Will Protect Consumers

Regulation To Prevent "Cut Throat Competition" In Alberta

Edmonton.—Full protection of consumers under any business code to be adopted in Alberta will be demanded by the government, Premier Aherhart declared, in commenting on discussions between retail and wholesale merchants and the government toward establishment of regulations to prevent "cut-throat competition" in the trade. It was reported that the government took the view that retailers, wholesalers and manufacturers must join in drawing up their own codes and then have their proposals approved by the government.

Chinese Girls Guide Tourists

Shanghai.—China.—Modern young Chinese girls are being trained as tourist guides by the Shanghai guiding service. The girls, stylishly dressed, are many of them, from well-to-do families. They work for 25 cents an hour conducting parties on tours of shops, sightseeing or on social tours.

Aviator Promoted

Edmonton.—C. H. "Punch" Dickins, superintendent of Mackenzie river district, Canadian Airways Limited, and winner in 1934 of the McKee trophy for outstanding flying, has been promoted to general superintendent of northern aviation for the company. It was learned here.

Spruce Grove News.

Members of the Ladies Aid of the United Church are holding their regular monthly meeting at the home of Mrs. J. F. Forbes on Thurs. afternoon, Dec. 5.

Mrs. R. N. Sherwin, Mayerthorpe, spent a short holiday last week with Mrs. Elder.

The United Y.P.S. intend holding its regular bi-monthly meeting in United Church this Thursday Evening, Dec. 5th. A lantern-slide lecture will be given which should be of interest to those able to attend.

Due to the illness of Mr. Herman Ducholke, Harry Brox is at present employed by the McLeod Mercantile as chief truck driver.

Mr. Ken McKenzie, Edmonton, was a week-end visitor with Mr. H. McLeod.

Mrs. Ph. Losinski, who has been seriously ill for some time, is now undergoing treatment at University hospital, Edmonton.

Card of Thanks.

Mr. V. Pailer and Family extend their sincerest and heartfelt thanks and appreciation to all friends who so thoughtfully gave tributes of condolence, sympathy and many kindnesses.

Merchants to be Licensed.

All wholesale and retail merchants in this province will be licensed by the Provincial Government, beginning Jan. 1 next, it has been announced. The move, it is said, is being made at the insistence of the merchants themselves, and in some quarters is regarded as a preliminary to a system of merchandising codes of minimum or fixed prices on specific products in Alberta. The cost of the licenses has not been decided, but is expected to be about \$3.

C. N. Train Service.

Trains from the East arrive here on Sunday, Tues., Thurs. at 1:32 p.m.

Trains from the West arrive here on Sunday, Wed. and Friday at 6:23 p.m.

DR. R. A. WALTON,
PHYSICIAN AND SURGEON,
Office and Residence, 1st St. W.

"Grain Forum" is New Friday Radio Feature.

Grain Trade to Sponsor Short
Informative Talks and
Music.

Friday Dec. 6 at 8 p.m. M. S.T., will mark the opening of a new all-Western program, known as "The Grain Forum" which will be broadcast over a network of Western stations every Friday at the same hour. It is sponsored jointly by the Winnipeg Grain Exchange and the North-west Grain Dealers' Association and promises to contain several interesting features.

Tuneful music will be provided by a string orchestra known as the "Cereal Strings" and, on occasions, by a group of male singers.

Short, interesting addresses of not more than ten minutes duration will deal with various aspects of the production, distribution and marketing of grain.

An invitation will also be extended to all those interested in the growing of grain to submit questions on agricultural problems, all of which will be answered. The more important questions and answers will be broadcast.

The first talk on Dec. 6th will be introductory to the series and will contain some announcements of particular interest to the farming community.

On Friday, Dec. 13 a short talk on "World's Foodstuffs and the Place Occupied by Wheat" will be given; and on Friday Dec. 20 will be devoted to a special Christmas broadcast, featuring the orchestra and the male voice ensemble.

Other talks planned for early delivery are "Canada and Her Competitors"; "The services of the Country Elevator"; "The Grain Exchange, what it does and what it does not do"; "The factors that govern and influence the price of wheat."

Announcements will be made from time to time of other subjects to be discussed.

Alberta Prize Beef, 20c. Lb.

Champion Hereford and reserve titlist at the Royal Winter Fair in Toronto last week, both shown by the University of Alberta, brought 20c a lb. when sold by auction in Toronto. Grand champion steer, shown by an Ontario farmer, was sold to a department store for 75c a pound.

Weak with the Grippe.

Miss Anna Repko, 10845 98th St., Edmonton, writes—

"I was so weak with the Grippe that it made me quite helpless. A friend told me to try Dr. Martin's Tonic Remedy. And it certainly got me on my feet, and built up my strength. That I wish to let everyone know of this Remedy. How quickly it acts and how reliable it is. Children will take it readily, no mixing or fussing. It contains no Laxatives or narcotics. A quick acting tonic that builds up your Vitality. Dr. Emil Martin's valuable remedy for Coughs, Colds and La Grippe. Large bottle, price, 75c., at Hayes Drug Store, Stony Plain.

GIVE LASTING
Electrical
GIFTS

Always the Most Desired, Used and Appreciated

Have you ever watched women thrill over Electrical Gifts — heard them discuss how often they'll use them, the time saved, the work saved, the fuss and bother eliminated? Haven't you wished that your gift would be as much desired, as much appreciated? It won't be — until you, too, satisfy these All-year Longings with Gifts from your Electrical Dealer.

Electrical Gifts are so beautiful, so practical and so varied in price that whether you have many dollars to spend — or just a few cents — you can give a gift this Christmas which is intensely desired — and which will be keenly appreciated for a long time to come.

Make Your Selection
Early This Year

CALGARY POWER COMPANY LIMITED
S. PHILLIPS, LOCAL MANAGER, EDMONTON.

CHECK OVER YOUR CAR FOR WINTER DRIVING.

A careful check-over of your motor car at this time of year in preparing for winter driving is essential, according to Jac Mayer, of The Service Garage.

Close examination now may eliminate mechanical difficulties or other troubles that might develop during cold weather.

The Brakes, tires and lighting apparatus

should be given a thoro inspection, just to make certain that they are functioning properly and will continue to do so under winter-driving conditions.

Motorists also are warned to be on their guard against the deadly carbon monoxide. There always is danger in running the car in a closed garage.

The approach of cold weather always brings an increased toll of deaths from carbon monoxide. To combat this hazard, motorists are urged to make sure a window of their car is always open, and to keep their motors in accurate adjustment so that a minimum of harmful gas will be generated.

The heavy toll of road accidents also serves as a warning to motorists to carry insurance protection. In recent months many members have benefitted from the special accident insurance given free with memberships in Alberta Motor Ass'n.
